1999 AESOP PhD Workshop

University of Bergen, Norway

In addition to these Kristina Nilsson, Högskolan i Karlskrona, Sweden will give a perspective on her PhD experience and the relation between planning research and practice.

The AESOP PhD workshop this year will be joined by 39-40 European and North American students. At the time of writing the national affiliations of the students seems to become: 8 from the Netherlands, 7 from UK, 7 from USA, 4 from Sweden, 3 from Norway, 2 from Finland, 2 from Hungary, 2 from Germany, 1 (2) from Italy, 1 from Turkey, 1 from Azerbaijan, 1 from Switzerland, 1 from France. Three of the American students have been selected for a Fannie Mae Foundation grant of each 1000 dollars: the University of Bergen has given a "Social Housing Research grant" of NOK 10 000,- which is divided between three of the students; and a grant of NOK 25 000,- given by the Norwegian State Housing Bank, to support the participation of housing researchers from Eastern Europe at the congress, has as well been used to cover the costs in Norway for two of the students.

Housing research has, however, not been given priority in the selection of those students that have been admitted to the workshop amongst ca. 50 applicants. The selection has been based on the scientific quality of the abstracts sent in, however, taking into account that the number of students from one country should not exceed 7. This limitation in numbers did only come into effect for the Netherlands, although accepting one more than the quota. The "mild form of gender quotation" as practiced in Scandinavia has been used; meaning that in the case male and female have the same qualifications the female has priority. In the case of the PhD workshop this has been a minor factor in the selection as it was almost as many female as male students amongst the applicants. Anyhow, as much effort as possible has been done to make a fair selection. And we hope that we have got a group of students and supervisors that will function well together both socially and professionally

The contributions of all the participants will, we are sure, make the workshop at Finse a fruitful event for everybody. If you are "urbanites" you may blame me for the choice of location, but if you take this as a challenge too, I am sure you will remember the stay at Finse and in Norway as a very special event in you life. Welcome to good and intensive work

Arild Holt-Jensen In the following sections I have prepared some information on both the workshop and the place we are staving

Cutting off the edges on the manually scanned material

Badly "scanned" material from another library

да до 1. І. 1948 гобра "Рудине" yhe y нице, али је и даљи вован рад упор била преброђена. Трепроблеме. Међутим обим послова расли с застаје у раду. Overwhelmed with material

Польопривреда 200 VI. број 6-7, 1958.

олижавану мале Станите лали су свој велики поплонос својни неумонним вопоблики радом. Овакав рад био је позитивно оцењен од стране руководства y MURRICIANCIAN DOLOTORIANETE HPC, 1973 le JORETO DETDERE DA DO 1 1 1948, FOдине целокупия имовника и људство тадашњег пољоп. добра "Рудине" уђе у carran Crausme. Ono le mont sonas un nyry venous Crausme, any le u name crame силия Станце, оно је прав кори, на путу услова Станце, как је и дљез стане стручко-вачених кадрева остло исто. Покртаован рад упоност и самопретор довели су нам прву награду Министијства пољопривреде за научно-истража новти су на церу наряд, нала реброђена преброђена требало је сада иле даље и понирити у телезаније проблеме. Међутим, стање кадрока је остало не промењено, а задани у гелезанаје просонае, ленуула, стане кларова је ослава не промењено, а задани и обим послова расли су врло брио. У котекетизу је нађемо још ските да се не застаје у раду. Наредне, 1950. године Мик. полопривреде ни сили с на се не застају у раду, пареље, токо токане сила, новоприреље НРС награђује вајистакнутије трудбенике Станице. У јесев 1951. год. води се врзо дуга и удорив борба да Станица добије карантер повртврско научнопорядки и укорин окрон да отнана дооку наракто новрануето и истранята установ. Руховодяющи зактев и од 1952. година Подреонска отледна полоприврдя станция добија искључиво повртарски карактер. Ово је била прекретинца у животу и раду. Крајем 1951. и у првој половним 1952. опла предриница у маката и раду, крупа и у прод и сложава, и задани са важал. Од 1952. године усида ба системата. Наш број се повећава, и задани са важал. Од 1952. године усида са станице је перзаначетна. Тако је 1954. године број факултетсяна кадрова нараство на 13, а пабораната на 14. Број задатака, матеонјално ангажовање и остало, такође су се увишестручили. Земљишки посед обухватно ie 110ha, од којих је под огледниа било блигу 40ha. Одазав обим радода на пољу повртарства далеко је надмашно све што је дотле код нас рађено. Станица, а од 1953. године Завод постао је водеба институција у области подртарства у земљи. Но, и мимо знатног броја кадрова, бројних задатака, знатних упагања у обртна средства, Заводу је мяюто ведостајало. Техничка и пабораторијска опрема, грађевински објекти, мелиорације земљишта и др. били су озбиљини проблеми ове установе. Ако се овоме дода сразмерно млад кадар стручњака који је требало да се научно формира при Заводу, окда се могу сагледати објективни услови у којима се налазила ова сразмерно млада научна установа. Ради комплексие обраде повртарске и цвећарске проблематике при Заводу постоје 7 отсека и то:

- Отсях за оплеменивање и агротелнику повртарског биља; Отсек за селенирство поврба;
- Отсек за заштиту повртарског и цвебанског билья
- Отсях за агрохенију и исхрану повртарског биља;
- Отсек за прераду поврћа; Отсек за контроту селена поврћа и цвећа н
- Отсек за цвећарство

Связи од побројаних отсека у мањој или већој мери, већ према броју и техничкој опреми, третира проблематику на своје уже специјалности. Централни отсек у Заводу јесте Отсек за оплемењивање и агротехнику.

У вьему раде најбројнији кадрови и рад из ове области започет је од самот оснивања, тј. 1947. године. У другим отсешная, који су оновани 1952. године, а отсек за контролу тек 1953. године, ради се на бројним и актуелним проблемима повртарске науке и праксе. Како се из предњега види, у области оплемењивањ и агротехнике рађено је највише и најраније је започето. Због овога је и највећи број задатака решен из ове области.
