

LET'S BUILD AN OUTCOME SURVEY TOGETHER

AfLIA–EIFL webinar | Practical activity

Library programme: Lifelong Learning – Climate Change Education

IMMEDIATE OUTCOMES

1. Expected change: Better preparedness for potential disasters.

Measurement question: After attending the training, do you feel better prepared to respond to potential climate-related disasters?

2. Expected change: Improved climate resilience skills.

Measurement question: To what extent has the training helped you develop skills to adapt to and respond to climate-related challenges?

3. Expected change: Increased awareness of climate change.

Measurement question: On a scale of 1 to 5, how confident do you feel explaining climate change risks and resilience strategies to others in your community or workplace?

LONGER-TERM OUTCOMES

1. Expected change: Adoption of more climate-resilient agricultural practices.

Measurement question: What changes, if any, have you made to your agricultural practices since attending the training?

2. Expected change: Increased participation in tree planting.

Measurement question: Have you planted any trees since attending the training? If yes, how many?

3. Expected change: Increased community mobilization for environmental protection.

Measurement question: Since attending the training, have you organized or encouraged others to participate in environmental protection activities in your community? If yes, please describe these activities.
